
DOT traffic study on traffic volume

Hello,

I'd like to thank the Safety Committee for their tireless work on improving the traffic issues in the village and for keeping everyone safe.

I believe it's crucial to get a proper DOT traffic study to determine volume, patterns, and speeds.

Absent having a traffic study, it's a guessing game that may not include input from less vocal residents.

Having a traffic study is part of the funding process as well to seek Town, State, and Federal safety grants.

Furthermore, I'd suggest having all village streets included to allow for before and after statistics.

I'm not for or against speed bumps and stop signs but we may find they influence traffic patterns in unintended ways as people may seek to bypass them by shifting from Town to Village roads.

Sincerely,

Don
